Plum can provide SonicWall firewalls as part of a complete package with ADSL and router or can supply them individually to an existing connection. The SonicWALL® TZ Series is the ultimate security platform for small and distributed networks, providing a choice between absolute ease-of-use for basic networks and unsurpassed flexibility for networks with more complex needs.

PROTECTION AT THE SPEED OF BUSINESS.™

Malicious attacks can penetrate outdated stateful packet inspection firewalls. The TZ Series integrates a deep packet inspection firewall, 802.11b/g secure wireless, gateway anti-virus, anti-spyware, intrusion prevention, content filtering, failover/failback technologies and IPSec VPN capabilities into a cost-effective solution, and scales to protect your investment as your organization grows. Available in multiple hardware and node configurations including the **SonicWALL TZ 150, TZ 180 and TZ 190**, the TZ Series is ideal for small businesses, remote and branch offices and retail/point-of-sale deployments.

Securing networks against today's sophisticated attacks demands Unified Threat Management (UTM). Every TZ Series appliance is available as a SonicWALL® TotalSecure™ solution, a convenient and affordable solution that combines the hardware and all the services needed for comprehensive network protection from a wide range of network threats including viruses, spyware, worms, Trojans, keyloggers and other malicious threats. Together, these components form a UTM solution that delivers exceptional security to protect against emerging threats..

What our customers say?

"The best thing about doing business with Plum Communications is the after sales relationship, if anything goes wrong we can put a face to the problem and get it sorted"

Features

High-performance deep packet inspection firewall

A configurable high-performance deep packet inspection firewall provides enterprise-class protection for key Internet services such as Web, e-mail, file transfer, Windows services and DNS.

Real-time gateway anti-virus, anti-spyware and intrusion prevention

Gateway anti-virus, anti-spyware and intrusion prevention provides real-time security against the latest viruses, spyware, software vulnerabilities and other malicious code.

Support for 3G and analog modem PC cards

The TZ 190 features a modular design that supports 3G and analog modem PC cards for use as either a primary or secondary WAN connection.

Automated WAN failover and failback

Integrated and automated WAN failover and failback ensures continuous uptime by failing over to an alternate WAN connection should the primary fail.

effective communications for business

business goal: business improvement • connectivity • cost reduction • security

plum communications ltd

Secure 802.11b/g wireless LAN

Secure 802.11b/g wireless LAN technologies provide WPA2 or IPSec secured high-speed wireless connectivity.

Port level security

SonicWALL PortShield Architecture provides the flexibility to configure port level security for the LAN, providing protection between devices inside the LAN.

Intuitive configuration wizards

Intuitive configuration wizards simplify even the most complicated tasks, including VPN set-up, NAT configuration and public server configuration.

Global management and reporting

Award-winning Global Management System (GMS) provides comprehensive global management and reporting tools for simplified configuration, enforcement and management from a central location.

SonicWALL TZ 150

An entry level security platform delivering business-class protection to small offices in an easy-to-use, affordable solution.

Ideal for home and small offices, the TZ 150 Series integrates a deep packet inspection firewall, IPSec 3DES/AES VPN and 802.11b/g secure wireless capabilities in an easy-to-use, low cost platform.

SonicWALL TZ 180

A high-performance network security platform that provides threat protection for home, small, remote and branch offices.

Designed as a complete Unified Threat Management (UTM) platform delivering business-class protection to small, remote and branch office networks. Features an integrated 5-port auto-sensing MDIX switch and configurable optional port.

SonicWALL TZ 190

A complete network security platform for small businesses, branch offices or portable networks that adds modular PC and WAN support.

The flagship of the SonicWALL TZ Series, the TZ 190 is a high-performance security platform that integrates a Type II PC Card slot for WAN backup for small networks with mission-critical needs. Includes automated failback.

Available SonicWALL TZ Series

	<u>Number of Users</u>	<u>Number of Nodes</u>	<u>Price (£)</u>
SonicWALL TZ 150	Up to 2000 users	Up to 10	On application
SonicWALL TZ 180	Up to 6000 users	Up to 25	On application
SonicWALL TZ 190	Up to 6000 users	Unlimited	On application
