**P**lum mobile call service provides businesses with a cost effective and resilient means of communication. Available throughout the UK calls can be made via existing mobile phone phones and where required new handsets can be provided. We provide mobile phone software which helps to reduce the cost of your calls on your mobile. When dialling an 08 number, the number is re-routed to a local 01 or 02 number, meaning that you would only pay local rates for an 08 number. This service also provides for lower call costs to local and international numbers. Plum can review existing mobile usage and invoices and will most usually provide cost savings when compared to the existing tariff.

### What our customers say?

*"The best thing about doing business with Plum Communications is the after sales relationship, if anything goes wrong we can put a face to the problem and get it sorted"*

### Choose your own hardware

The mobile phone software is compatible with a variety of mobile phones and laptops, so there should be no need to purchase dedicated mobile devices with limited functionality. If you do need a compatible mobile we can provide this. For a full comprehensive list of compatible devices please visit: [www.plumcom.co.uk/pdfs/compatibledevices.pdf](http://www.plumcom.co.uk/pdfs/compatibledevices.pdf)

### No contract

There is no initial free and monthly rental, you only pay for the cost of calls.

### No need to change network

Users can use the software whilst staying with their existing network and using their existing SIM card.

### Cost reduction

Whilst the software is running on your phone, you will be able to make calls at lower costs. These costs include calls to 0844/0845 numbers at 8.73p per minute, calls to 0870 numbers at 13p per minute, local calls costing less than 5.5p per minute and calls to other European countries priced at under 6p per minute. View the table overleaf for more rates.

### Easy to set up

- 1 - We will ask you for your phone's IMEI and telephone numbers.
- 2 - We will text you a unique registration code and a link to download the software onto your phone.
- 3 - Install the software and then register it by entering your registration code.
