Plum provide an easy to use website design tool which will allow you to easily create, edit or delete web pages for your website quickly and easily without needing to know any programming languages. We will also host your website and email account for you.

What our customers say?

"The best thing about doing business with Plum Communications is the after sales relationship, if anything goes wrong we can put a face to the problem and get it sorted"

Features

- Quick set-up

- No programming skills necessary

- Create, modify, delete and publish your own pages

- Pay monthly

- Low cost

SiteBuilder

We know that not everyone has the knowledge or skills to create a website from scratch. If you're looking for a fast, professional-looking website without the hassle of coding and formatting, then our SiteBuilder tool is the perfect solution. Creating your website is quick and easy, and you get full control of the design and structure of your website.

You can create a website in 5 simple steps:

(1) **Choose your website name**
    Give your project a name and specify the pages you need for your website.
(2) **Choose a template**
    Choose from a huge range of professionally-designed personal, business and organisation website templates
(3) **Choose your images**
    Take your pick from an expansive library of images fully licensed for you to use on your website, or upload your own slogans and pictures.
(4) **Insert your content**
    Upload content to your web pages and customise fonts, with the flexibility to arrange your page layout.
(5) **Publish to the web**
    You can publish it to the web instantly

*** If you don't want to create your website yourself, we can do it for you ***

Analytics

We will provide you with a web analytics tool, so that you can find out about the number of hits and visits your website is getting, which pages are being looked at on your website,

effective communications for business

business goal: business improvement • connectivity • cost reduction • security

website design

and how people are getting to your website.

Password Protection

With password protection and our secure hosting locations, your website and CMS is highly secure. Although you can access the website from anywhere, your personal details and access to your site is secure.

Blog

A blog (web-log) is an easy-to-use website, where you can post text, photos and images to record anything you like. Setting up a blog only takes just a few minutes and does not require any technical skills. You can use your blog for anything, from staying in contact with communities, to creating awareness of your business by communicating with prospective and existing customers. Blogging can also be used to compliment an existing website - a great way of generating additional traffic and building relationship with your users.

FTP

We can set up file to protocol (FTP) software so thay you can upload pages, files, images, videos, etc to your website hassle free. You can also define user rights for files and folders; ideal if you need to restrict access.

TrafficDriver

We want to help ensure that your website is found on search engines. TrafficDriver provides all the tools necessary to achieve a great search engine ranking, with advanced submission and optimisation: automatic monthly search engine submission, meta tag generation, and search engine optimisation (SEO) advice customised to your website.

Hosting

We include email (20 MB storage space) and web hosting in the cost of this website design service because we're not keen on hidden extras, so we're committed to quality in every part of the service.

Accessibility

Our websites are built around very strong accessibility principles. This means your site is easily accessible to people with a wide range of abilities and a wide range of systems.
